FOR IMMEDIATE RELEASE

China Green Agriculture, Inc. to Present at Rodman & Renshaw Conference

Xi'an, China – October 27, 2008 – China Green Agriculture, Inc. (OTC Bulletin Board: CGAG) (“China Green Agriculture” or “the Company”), a leading producer and distributor of humic acid (“HA”) based liquid compound fertilizer through its wholly owned subsidiary, Shaanxi TechTeam Jinong Humic Acid Product Co., Ltd., today announced that the Company’s chief financial officer will present at the upcoming Rodman & Renshaw Global Investment Conference in New York City.

The date, time and location of China Green Agriculture’s presentation at the conference are as follows:

Date: Monday, November 10, 2008
Time: 5:20 PM
Venue: Henry Salon, 5th Floor
The New York Palace Hotel
455 Madison Avenue
New York, NY 10022

The three-day conference will feature presentations from CEOs and CFOs from companies in a variety of sectors, including energy, metals, mining and healthcare, with Asia & Growth, Energy, Healthcare, SPAC, and Steel, Metals & Mining tracks. So far more than 400 companies have already registered to present at the conference. For more information, please view www.rodmanandrenshaw.com or email lk@rodmanandrenshaw.com.

About China Green Agriculture, Inc.

China Green Agriculture, Inc. produces and distributes humic acid (“HA”) based liquid compound fertilizer through its wholly owned subsidiary, Shaanxi TechTeam Jinong Humic Acid Product Co., Ltd., (“TechTeam”). TechTeam produces and sells approximately 10,000 metric tons of over 100 different kinds of fertilizer products per year. All of TechTeam's fertilizer products are certified by the PRC government as green products and suitable for growing Grade AA "green" foods, also known as green products that contain little or no chemical materials, as stated by the China Green Food Research Center. TechTeam's fertilizers are highly concentrated liquids which require an application of approximately 120 ml per mu per application. Its average end user has approximately four mu of land (one mu = .165 acres).

China Green Agriculture currently markets its fertilizer products to private wholesalers and retailers of agricultural farm products in 27 provinces in the PRC. The leading five provinces by revenue for the fiscal year ended June 30, 2007 include Heilongjiang (9.53%), Shandong (7.55%), Anhui (6.71%), Xinjiang (6.52%), and Henan (6.51%).
